Accentz

SERIES

The ACCENTZ Series is a collection of on-trend solid designs developed for uniform looks. Each was also expertly created to not only stand alone, but to pair with our woodgrains thereby enhancing the overall look of a space.

Taction Oak

SERIES

Make a bold design statement by pairing all the benefits of TFL with a look and feel that rivals real wood! TACTION OAK's Series of embossed in register (EIR), true-to-life laminated panels mimic oak's natural characteristics using technology that captures and registers the pattern on the plate itself, elegantly synchronized two-sides for a unique dual low-gloss finish.

PRISM Collection

arauco
PRISM
LOVE YOUR LAMINATES

PRISM is your perfect partner

PRISM TFL on high quality particleboard and MDF substrate, is manufactured entirely by ARAUCO at our facilities across North America. We manage our own inventories to maintain a current and balanced design offering and a dependable supply you can count on. For sales and support services, email araucona.marketing@arauco.com

PRISM TFL is all matched up! Our Symmetry Program features a wide array of complementary products. Edgebanding, HPL, 3DL, doors, wrapping and moulding products are available for our entire collection. Our strong partnerships with trusted suppliers will ensure that your projects have a cohesive and natural look.

PRISM is a truly sustainable surfacing solution. We're loaded with certifications and our panels comply with TSCA Title VI/CARB-2. Want smart? Use our Life-Cycle Assessment data, EPDs, Transparency Briefs and HPDs to support your LEED projects. There is lots of documentation on our website.

PRISM TFL is raising the bar for laminates with InCopper™ antimicrobial technology. This proprietary technology is available in the United States for PRISM TFL exclusive designs. The additive serves to protect the surface of the panel actively inhibiting the growth of fungi, mold, mildew and odor-causing bacteria that cause deterioration, stains or degradation. The secret? Naturally-occurring copper salts that remain active as long as the panel surface remains intact. * Visit na.arauco.com/InCopperZone for more information or contact your sales representative.

The PRISM website has everything you need to get it done; inspiration and sample ordering made easy. Make something fun at www.prismTFL.com

***NOTE:** This product does not protect the users or others against bacteria, viruses, germs or other disease-causing organisms. Follow the cleaning instructions on the Maintenance & Cleaning Guide for PRISM TFL Panels.

PRISM TFL designs with InCopper are only available in the United States.
